

LOT 06 — Visual Coil Inspection Line

Ex-Erasteel Vikmanshyttan, Sweden — AB DELLNER AMCO / MASKINSYSTEM, strip width 25–100 mm

Hilco Industrial offers this **visual coil inspection line** built by AB DELLNER AMCO and MASKINSYSTEM for Erasteel Vikmanshyttan. Strip is uncoiled at controlled speed, guided through strip guides to a visual inspection station equipped with an in-line measurement gauge for surface and edge defect assessment, then recoiled.

Uncoiler → Strip Guides → Measurement Gauge → Visual Inspection Station → Recoiler

Make	AB DELLNER AMCO / MASKINSYSTEM
In-line measurement gauge	Yes
Strip width	25 – 100 mm

Visual coil inspection line, Erasteel Vikmanshyttan

What it does

A coil-to-coil visual inspection line for surface and edge quality assessment of cold-rolled strip, with in-line measurement gauge. Strip is uncoiled at controlled speed, guided through inspection, and recoiled — providing a dedicated QC step prior to shipment or further processing.

Suitable applications

Final inspection of HSS, tool steel, and specialty alloy strip 25–100 mm wide. Applicable to producers requiring documented surface quality, or as an incoming inspection line for traded coil stock at service centres.

Investment case

Low-cost standalone quality line with in-line gauging — offered at a fraction of comparable new equipment cost, ready for immediate integration into any strip production or service centre operation.

Inspection available. Contact Hilco Industrial for site access. Full technical documentation, drawings and specifications are made available to qualified prospects under NDA.

Scope and condition. Equipment is offered on an as-is, where-is basis. Full inclusions and exclusions schedule, equipment drawings, and technical specifications are made available under NDA. Inspection of the site in Vikmanshyttan, Sweden, can be arranged for qualified prospects.
