

LOT 08 — Stone Circular Surface Grinder (KARLEBO / BLANCHARD)

Ex-Erasteel Vikmanshyttan, Sweden — ABB electrical, 380 V / 3-phase / 50 Hz / 90 kVA

Hilco Industrial offers this **KARLEBO Stockholm / BLANCHARD stone circular rotary surface grinder** from the former Erasteel Vikmanshyttan plant. Supplied with a feeding table and ABB electrical installation (380 V, 3-phase, 50 Hz, 90 kVA), the machine delivers high stock-removal rates over large surface areas — suited to flat-face grinding of rolls, dies, and large steel components.

Make	KARLEBO Stockholm / BLANCHARD (USA)
Grinding type	Rotary / Stone Circular
Feeding table	Yes
Electrical supply	ABB — 380 V, 3-phase, 50 Hz, 90 kVA

Stone circular surface grinder (KARLEBO/BLANCHARD), Erasteel Vikmanshyttan

What it does

A rotary stone circular surface grinder for high-stock-removal flat-face grinding. The rotating magnetic table and circular stone wheel enable efficient surface conditioning of rolls, plates, and flat tool steel components to tight flatness tolerances.

Suitable applications

Surface grinding of work rolls, backup rolls, die plates, and large flat components in steel plant, tooling, and precision machining environments. Suited to HSS roll maintenance and heavy flat-stock surface conditioning.

Investment case

Heavy-duty rotary surface grinder with ABB electrical installation — offered at a fraction of comparable new equipment cost, immediately available for any roll shop or precision grinding operation.

Inspection available. Contact Hilco Industrial for site access. Full technical documentation, drawings and specifications are made available to qualified prospects under NDA.

Scope and condition. Equipment is offered on an as-is, where-is basis. Full inclusions and exclusions schedule, equipment drawings, and technical specifications are made available under NDA. Inspection of the site in Vikmanshyttan, Sweden, can be arranged for qualified prospects.
