- Twin Side by Side Foaming Machine CANNON Foaming machine | 1999
- (2) Thimon Shrinkhood packaging Machines THIMON COVERPAL 1250 | 1999

ABOUT THE SALE

The complete contents of the Electrolux White Goods Manufacturing Facility in Jászberény, Hungary, are being offered through a series of private treaty and auction sales, held in conjunction with Intergavel. The facility produced 440,000 domestic refrigerators annually and is being cleared following a reorganisation of the business.

This is a rare opportunity to acquire proven, high-volume production capability from a leading household appliance manufacturer — well suited to resale, relocation, or capacity expansion in plastics and metal processing.

Viewing by appointment only. For further details and registration, visit maynardseurope.com.
